

ITC CONFERENCE GRANT SCIENTIFIC REPORT

Action number: CA15224

Conference title: The 15th European Poultry Conference (Dubrovnik 2018), Croatia

Conference start and end date: 17/09/2018 to 21/09/2018

Conference attendance start and end date: 17/09/2018 to 21/09/2018

Grantee name: Lazarin Lazarov

ACTIVITIES DURING YOUR ATTENDANCE AT THIS CONFERENCE:

During the conference, the following activities were carried out:

1. A report was presented on the topic "Use of calcium particulate and feeding time in combination with 25-hydroxycholecalciferol to reduce fracture susceptibility in laying hens"
2. The scientific and plenary sessions of the conference were attended.
3. Meetings were held with scientists working in the field of bird pathology as well as representatives of the egg and poultry business.
4. The activities and capabilities of the COST Action CA15224 "Identifying causes and solutions of keel bone damage in laying hens" have been popularized.

IMPACT ON RESEARCH AND FUTURE COLLABORATIONS

During the conference I had the opportunity to meet with scientists working in the field of bird pathology as well as representatives of the egg and poultry business. During these meetings the activities and capabilities of the COST Action CA15224 team "Identifying causes and solutions of keel bone damage in laying hens" have been popularized. I hope that part of these new contacts will lead to future collaboration and joint projects.
